

## **Hoffman, Barney & Foscari Home**

Hoffman, Barney & Foscari Home debuts with its first lamp. Conceived and designed in London by our creative direction team, its first 'classic' version was then graphically developed - based on the original drawings by Glauco Della Sciucca - by Joanne Mills Interiors in Kensington Church Street.

For an eloquent three-dimensional simulation of the original idea, Made in London by Hoffman, Barney & Foscari. Focusing on research sensitive to proportions and characteristics that evoke or alternatively refer to the unmistakable logo of Hoffman, Barney & Foscari, this stunning lamp creates a great atmosphere in interiors - never too vintage, never too trendy - and represents the first step in a diverse Home collection to be launched soon. Its infinite AI versions, curated by Marchegiani Design, reflect a dual creative path: the unsurpassed world of classic craftsmanship and its revisitations, which are certainly "artificial" but no less original for that. Extraordinarily original.
